

Brighton Collaboration Webinar on Tools for COVID-19 Vaccine Safety Assessment

Introduction to Brighton Collaboration Safety Platform for Emergency vACcines (SPEAC)

Project COVID-19 Vaccine Tools:

- COVAX-SPEAC program to support COVID-19 vaccine candidates' safety assessment
- COVID-19 Vaccine Adverse Events of Special Interest (AESI) List
- Vaccine-Associated Enhanced Disease and Standard Case Definition
- Vaccine Technology Safety Templates

Date & Time: Thursday 27 Aug 2020: 11:00AM - 12:30PM EDT, 17.00PM - 18:30PM CEST

Length: The meeting will have 60 minutes presentations plus 30 minutes Q&A. The meeting will be recorded for later sharing online

Target audience: All COVID-19 vaccine developers and other interested stakeholders

Background:

The Coalition for Epidemic Preparedness Innovations (CEPI) partnered with the Brighton Collaboration to harmonize the safety assessment of its vaccine candidates. In response to the COVID-19 pandemic, SPEAC is supporting COVAX, an initiative co-led by CEPI, Gavi and the World Health Organization (WHO) with the aim to develop, manufacture and fairly allocate 2 billion doses of COVID-19 vaccine by the end of 2021 to end the acute phase of the pandemic. The WHO Global Advisory Committee on Vaccine Safety (GACVS) has recommended the wide dissemination of many SPEAC COVID19 tools.
